PROFESSIONAL SUMMARY

Computer Science senior with hands-on experience in software development, web applications, and technical support. Proficient in Python, JavaScript, React, Node.js, Flask, and SQL, with experience building functional front-end and backend components. Strong troubleshooting, problem-solving, and communication skills developed through leadership and Tier-1 IT support experience. Seeking entry-level opportunities in IT support or software development.

TECHNICAL SKILLS

PROGRAMMING LANGUAGES & WEB DEV:

C++, Python, JavaScript, React, Node.js, HTML, CSS, Bootstrap, Flask

DEVELOPMENT TOOLS & ENVIRONMENTS:

Git, GitHub, Visual Studio Code, PyCharm, Microsoft Azure

OPERATING SYSTEMS:

Windows, Linux, MacOS, iOS, Android

NETWORKING:

LAN/WAN configuration (coursework), VirtualBox

DATABASES:

SQL, CSV data handling, JSON

PROJECTS

Manga Inventory Project: Web Dev Project at Lewis University

- Developed a web-based inventory management application using Python, HTML, and CSS.
- Implemented full CRUD functionality (Create, Read, Update, Delete) for managing manga records.
- Designed and maintained CSV-based data storage for reliable data handling

GitHub: <https://github.com/FMontiel01/MangaShopProject>

Habit Tracker (Python, JSON, Flask) Personal Project – In Progress

- Currently designing and developing a habit-tracking app with progress tracking with JSON data storage.
- Building a Flask backend to support web-based interactions and future expansion

GitHub: <https://github.com/FMontiel01/habit-tracker>

EDUCATION

Bachelor of Science in Computer Science

Lewis University, Romeoville, IL

Expected: Aug 2026

GPA: 3.5/4.0

Relevant Coursework:

Software Engineering, Theory of Algorithms & Computation, Artificial Intelligence, Web Programming, Algorithms & Data Structures, Client-Server Computing, Database Systems

CERTIFICATIONS

C++ Language Certification – College of DuPage, May 17, 2024

EXPERIENCE

Assistant Front End Manager

Winter 2017 – Present

Jewel Osco, Woodridge, IL

- Provided Tier-1 IT support for POS systems by diagnosing hardware and software issues
- Configured and maintained POS registers to ensure daily operational readiness
- Assisted with software updates and troubleshooting during system disruptions
- Trained employees on POS systems, mobile payment platforms, and digital workflows
- Communicated technical information clearly to non-technical users
